1. About 500 troops, including about 300 recruits, wearing red-bordered black epaulets without branch-of-service insignia, were quartered in the Luftnachrichtenschule and the Fliegerhorst Kaserne, Halle (M 52/D 92), between 28 August and 7 September 1950. Most of the soldiers were billeted in the building of the Luftnachrichtenschule which was north of the main gate. Small groups of recruits were also seen in the Fliegerhorst Kaserne where they probably went for training. About 25 percent of the trained personnel wore red-bordered black epaulets without insignia, 25 percent with tank insignia, 25 percent with artillery insignia and 25 percent with motor transport insignia. The ratio between officers and EN was normal and did not indicate that a headquarters was located there. Motor vehicles

25X1A

25X1A were observed in the billeting area. A washing installation for tanks or motor vehicles was being constructed behind the garage at the fuel dump. *
